– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-36, drawn to a method of ecommerce in a virtual network infrastructure, classified in class 705, subclass 26.
- II. Claims 37-39, drawn to a virtual network resource infrastructure, classified in class 700, subclass 2.
- III. Claims 40-43, drawn to a text object translation method, classified in class 705, subclass 27.
- IV. Claims 44-48, drawn to a method of exchanging website interfaces, classified in class 705, subclass 27.
- V. Claims 49-50, drawn to a method of user surfing tracking, classified in class 705, subclass 7.
- VI. Claims 51-52, drawn to a method of customizing a website, classified in class 705, subclass 27.
- VII. Claim 53, drawn to a method of uploading a file, classified in class 700, subclass 1.
- VIII. Claim 54, drawn to a method of displaying e-services, classified in class 705, subclass 27.
- IX. Claims 55-57, drawn to a method of providing 3 level hosting, classified in class 700, subclass 2.

Art Unit: 3627

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can practice a substantially different method.

Inventions I and III-IX are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the particulars of the subcombination are not relied upon in the combination. The subcombination has separate utility such as methods usable in general internet of ecommerce computing independent of the combination.

Inventions III-IX and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used to practice a substantially different method.

Inventions III-IX are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention has separate utility based on its independent function divorced from the other subcombination functions. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

It is noted that the restriction requirement is based upon the examiner's best understanding of the claims. In the event that upon further examination, it becomes apparent that further independent inventions or species are nested within the elected invention, the examiner reserves the right to provide a further requirement.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven B. McAllister whose telephone number is (703) 308-7052. The examiner can normally be reached on M-Th 8-6:30.
